

VADYM VOITSEKHOVSKYI

SOFTWARE ENGINEER

 Obukhiv, Kyiv region, Ukraine

 <https://cv-resume-pearl.vercel.app/>

PROFILE

I develop web, mobile and desktop solutions, focusing on ensuring that the functionality is clearly implemented and the apps have well-thought-out logic, not just a beautiful interface. I have about 3 years of practical experience in creating diverse products such as mobile finance and weather applications, blog and car service web apps, desktop applied programs such as task manager, chatbots, and mini-games. I really like making various animations using code. And I also have some experience in firmware for IoT-devices (camera, buzzer, LED). As a backend engineer, I comprehend building REST APIs, designing UML, MVC, and MVVM patterns. I know a lot of technologies, in particular Java, .NET, JavaScript, and when developing, I select them depending on the task and its requirements. There are some projects where I worked in a team, but I implemented most of them independently. I work with AI tools when developing. My weaknesses are front-end and web design.

EDUCATION

2020 - 2024

CIST KNEU named after V. Hetman

Professional Junior Bachelor

I received a complete general secondary education based on 11 grades and a professional pre-higher education with the educational and professional degree of a professional junior bachelor in the specialty Software engineering.

2024 - 2027

SUICT

Bachelor

I am pursuing a higher education with a bachelor's degree in Software engineering.

EXPERIENCE

2024 (2 months)

PrJSC KCPM

Intern

I did my internship in the IT department of a manufacturing company. I independently developed 2 software solutions.

2025, 2026

DES Winter School
NIX Solutions

Intern

Twice participated in the Data Engineering and Security IT intensive, where I gained experience from leading industry practitioners. As a result, together with the team, I developed and defended 2 projects. Also I interned at an IT company in an online format, where worked with the team using Scrum and developed a project.
